

# SANO FOOD

*Healthy Food in town*

Created by Dennis Chan and Joe Moreno

## KEY FEATURES

---

After the design and development of “Sano Food”, the development team provided:

- **Healthy food menu and prices** to keep guests informed
- **Blog** to provide tips to live a healthy life
- **Table reservation booking** to allow guests see what times are available without having to talk to a host
- **Contact information** for the multiple locations across United States so when guests head to the website, they would grab the most basic information: the address, the hours, and a way to contact the restaurant
- **Link to Social Accounts and Posts.** Social media is one of the best ways to engage with customers and share great photos and updates from the restaurant
- **Website Mobile-Friendly.** The website can be viewed between the different viewports.

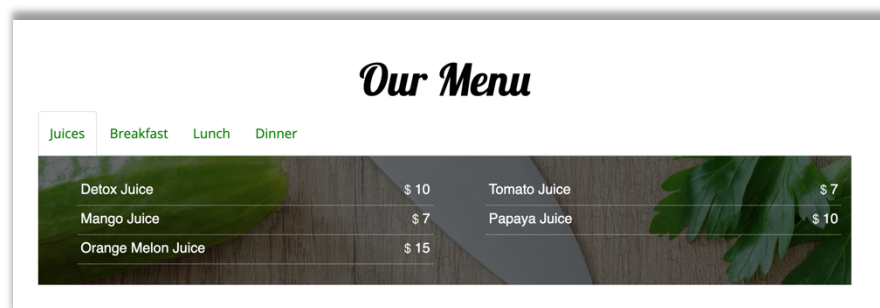

## DESIGN AND IMPLEMENTATION

---

Overall,

- “Sano Food” website is using light colors like blue and green to build the branding
- The website is built based on a minimalist point of view

- The website has an easy navigation flow where the customer can look at the menu, prices, restaurant contact info, make a reservation table at the different locations, and a blog to help to engage the audience. The site provides links in every page to support the features described.
- We modified the original scope in regards “restaurant locations” adding locations throughout United States instead of Florida only.
- We used the following components:
  - **Forms:** Used to capture client contact information and table reservations.
  - **Navigation bars:** Used to navigate between the main menu links.
  - **Navigation tabs:** Used to navigate between the different food menu sections.
  - **Carousels:** Used to show different food images and restaurant locations.
  - **Cards:** Used to show chef recommended dishes.
- **“Sano Food” Screenshots:**

## Chef Recommended

### Grilled Salmon

A simple soy sauce and brown sugar marinade, with hints of lemon and garlic, are the perfect salty-sweet complement to rich salmon fillets.

[Menu](#)

### Detox Juices

Drinking fresh juices can detoxify the body, help to create a more alkaline body, and to give a boost of energy and a clear mind.

[Menu](#)

### Fruit Toast

Toast the slices of fruit bread. Mix ricotta with honey or jam in a small bowl. Layer cranberries and strawberries on top of toast and serve.

## ***Healthy Eating – Guidelines for Beginners***

The foods you eat have big effects on your health and quality of life. Although eating healthy can be fairly simple, the rise in popular “diets” and dieting trends has caused confusion. In fact, these trends often distract from the basic nutrition principles that are most important. This is a detailed beginner’s guide to healthy eating, based on the latest in nutrition science.

## **CONCLUSIONS**

---

- 1) It was difficult at the beginning to design the website from scratch so we have learned to create a **mockup** for the project, and design a **navigation flow** between the different web pages.
- 2) We have learned to **work as a team** placing the source files in **GitHub**.
- 3) We wanted to add radio buttons for the time slot option under the **Reservation form**, but we got stuck in JavaScript so we decided to hard code the different time alternatives.
- 4) We did like to add **Carousels** to the website. They look very nice specially the ones we used on the restaurant locations.
- 5) The **Menu navigation tab** fitted the purpose to show the restaurant menu so that people can easily navigate between tabs.
